

## An Appeal

Every school has its unique tradition. Our school is the only school in the region to offer best possible education with lowest fees structure in one whole year. We take only two fees, the annual session fee and monthly tuition fee. No other charge, except two exam fees, we take from the guardians. A school has two aspects. First, the institution with its adequate infrastructure and second, the good teaching and non-teaching staff members. Our annual (one time) session charge is meant for the school infrastructure to survive and the monthly tuition fees are meant for the staff members to support their families. The exam fee we charge if the exam happens and the bus/van fee we charge if at all the students come by school bus/van.

Therefore, the recent controversy whether to pay or not to pay the school anymore because of Covid-19 rests on the good conscience of our guardians. If the Dreamland guardians decide to kill the school and staff members, they will not pay session fee and tuition fee to school. If the Dreamland guardians, most of whom belong to the middle class family (not rich people), think that our school should not survive after Corona, they may do as they decide best for their children's future years after the pandemic.

Let's turn to history, World War 1 World War 2, still the world survived and made monumental progress in all fields of human civilization. The reason is no war killed the educational system and its institution. In course of time, in 2020 we unfortunately witness the sharp deterioration of human senses. Some people with self-destructive attitude have propounded the dangerous proposition "no school, no fees". These people are ignorant about their children's future. It is my humble request to the guardians, please pay our school fees in time and apply the good sense in the interest of the children's career. If Dreamland doesn't survive in Corona, no school can better take the care of your children. Please fight with the third World War called Corona-19, but don't kill the educational institution like ours for the future of your children. May God help us to overcome the recent crisis and give us good senses to keep our children protected with education.

Thank you with best of regards,
